## WARREN MILLER.

His Speech at the Republican Convention in Huntington.

### ELOQUENT REVIEW OF FACTS

Which Show what the Country Has Lost by Electing the Democratic Party to Power—The Record of the Republican Party, which stands for the American Home and American Labor.

Following is an abstract of the splendid address delivered by Congressman Warren Miller, at the recent district delegate convention, of which he was chairman. It should be read by every citizen of West Virginia:

Mr. Miller began his address with a brief review of the progress of the country since the formation of the government, its growth in wealth and population, and the bountiful natural resources bestowed upon it by Providence. Coming to the tariff question, he said:

To maintain our vast government, which secures us in the enjoyment of life, liberty and the pursuit of happiness, we must provide and expend annually more than \$500,000,000—almost \$2,000,000, each day. Concerning the best methods of raising this vast sum, men have disagreed, since the foundation of the republic, and yet are not agreed. The Republican party, so well represented, and so much in evidence here to-day, has taught and practiced a system that required the foreigner seeking the benefits of our markets with artificial, which would compete with our own, to contribute to the expenses of our government, at least the difference between the cost of his commodity produced by the necessarily cheap labor of other lands, and the cost of similar goods, made by American labor at home and paid for at remunerative wages. This financial principle, while observed, filled our treasury with revenues; enabled us to pay the current expenses of the government, and to maintain our national credit.

It induced and stimulated the investment of capital; and made profitable the construction and operation of railroads, factories, and other public improvements. It caused our mines to be opened; our forests to be felled; and our farm lands to be cleared and cultivated with profit. It made good wages for the laborer; good markets for the farmer; and good sales, and good profits for the merchant.

### The Sound Policy.

It is a sound financial, as well as the only safe business rule, that the revenues of a nation, as well as the income of an individual, should be equal to, or greater than its or his expenses. This has been the policy of the Republican party since its organization. In 1892 and prior years, the revenues of the government were greater than its expenditures. There was maintained in the treasury a redemption fund of \$100,000,000 in gold, which gave confidence to the people every day and every hour. Every person desiring work was employed, at good wages. All the splendid works of our machinery were all in motion. The consumption of our products was up to the highest point. Prosperity was seen and felt on every hand.

But in the midst of this era of industrial prosperity, we heard the Democratic slogan, "Grover! Grover! Four more years of Grover!" We have now more than four years of Grover—an era in ruined industries and business disaster. In that short time, the Democratic party has revolutionized our hitherto prosperous revenue system. It has given us one, instead, that has created a deficit in the revenues, necessary for the government, of at least \$140,000,000. Under it our expenses have exceeded the income of the government \$150,000 every day. In time of peace, the treasury has been compelled to borrow \$32,000,000 in gold; and for the payment of the principal and interest the whole country and its resources have been mortgaged to a foreign syndicate for years to come.

Jefferson, the patron saint of Democracy, declared it to be the duty of every good citizen, "to use no foreign article that could be made within ourselves." Yet our Democratic friends, anxious for "the markets of the world," have, by their hitherto untired system, caused to be imported into this country foreign goods of the value of \$125,250,000 during the last calendar year in excess of the imports of the year before. This means that \$125,250,000 have gone out of this country to pay for imported articles that should have been, and otherwise would have been produced at home. It means the payment to a people of \$125,250,000 for allowing European the privilege of selling that additional amount of goods to American consumers. It means that \$125,250,000 have been taken away from American producers; American factories, and American laborers.

**What Free Wool is Doing.**

Under the Wilson-Gorman tariff regime, we have free wool, which, it has been said, "has wrought a destruction in flocks never yet equalled in this country by war, pestilence, or famine; blasting simoon, or withering mildew, by droughts, and storms, frosts, blizzards, coyotes, dogs or wolves."

In 1892, sheep husbandry was the seventh industry in importance and value in the United States. On the first day of January, 1893, our flocks numbered 47,753 sheep, of the taxable value of \$150,000,000, producing annually 264,000,000 pounds of wool. More than 1,000,000 of our farmers were engaged in that business. \$500,000,000 were invested in flocks and sheep farms, giving an annual return of \$110,000,000 to our people. Lands designed by nature for that kind of grazing, and unfit for other uses, were in this way made profitable to the owners, and were brought into taxation at an increased valuation. Immense sums were thus added each year to the wealth of the country.

In the midst of prosperity, the Wilson-Gorman simoon came upon us, withering everything within its course. The foreign importers of wool, who had before that time paid annually to this government about \$9,000,000 in duties, for the privilege of our markets, were by our political opponents, released of that sum as an inducement to them to destroy our great sheep industry.

We consume annually 650,000,000 pounds, or about 20 per cent of all the wool produced in the world. Under proper conditions, we can and would grow it ourselves; but, under existing

SOLD BY ALL DRUGGISTS.

laws for the year ending on the 30th of last September, there had been imported and sold in our markets 250,000,000 pounds of foreign wool. This means the payment by our people of \$100,000,000 in gold, to foreigners, for foreign wools and woolen goods, and the displacement of that amount of capital and labor in the United States.

The entire product of the gold mines of this country for 1892, was \$22,000,000; of the silver mines \$20,750,000—a total of \$42,750,000. Great as this sum is, it was \$26,000,000 less than the value of the mutton and wool product of the United States in that year.

This country, my friends, has forty-five large farms, and plenty of territory out of which to make more, with 70,000,000 of children, able to produce all the wool we need; but the party in power has said, we will mortgage the country for gold, and send it to Australia and other countries to buy foreign wool, and thus deprive a million of our people of their employment; destroy their capital business, and turn over to desolation millions of acres of our lands. The closing of every gold and silver mine in the country would be less ruinous than a course like this.

May we not attribute our scarcity of money; lack of employment of our people, and depression of business to the facts I have stated?

"If a foreigner should march an army for conquest to our borders, every loyal American would be ready to greet the enemy with bloody hands and open graves."

"Free wool drives to desolation, almost as ruinous to us as foreign conquest, vast acres, which can be made to yield golden harvest with golden hocks."

For the year just ended the number of sheep in the United States decreased 5,000,000. In West Virginia alone the loss was 206,000, or 24 per cent of all her flocks. Under the present policy, it will not be long, until this great industry shall have disappeared, with its attendant loss of valuation to the property of the country, and the cessation of our farm products necessary to its support.

### The Coal Industry.

We have in West Virginia 12,000 square miles, or 10,800,000 acres of coal—sufficient to supply the whole world for 500 years; enough to employ the capital and labor of a population in this state as dense as that of Belgium, for twenty generations to come.

To make its work of destruction more complete, the Democratic party laid its blighting hand upon that great source of wealth. It caused to be written in our national statutes that the foreigner might sell his coal to our people at a duty of thirty-five cents less on the ton, thus reducing the value of every ton of coal in our hills and mountains to that extent.

Let West Virginians contemplate the millions of dollars of loss in value to them alone, if this policy is to be continued. We are a coal producing state. We want to sell to others; but we do not want to buy. Our supply is inexhaustible. Five centuries hence the capital and labor of this country will be employed in the mining and marketing of this first great necessity of human life and comfort. Every cent of tariff reduction is a loss of that much of the value of our coal, the effect of which is, to cheapen the labor of the miner.

We have in our state 9,000,000 of acres of timber in the world, worth in money many millions of dollars.

As if not content in the destruction of our flocks, and the depreciation of the value of our coal, to the extent of almost countless millions, our timber and lumber must now meet a practically free competition in our own markets, which also reduces its value on an average of \$2 per thousand feet.

This reduction and exemption of the tariff on coal, timber and wool, has entered into and increased the great defect in the government revenues, on account of which we are borrowing money, and paying an interest thereon to-day.

**Sound Money.**

We have heard much of late about finance and the future financial policies of the great political parties, now contending for recognition by the people, and for supremacy in the control of the government.

Judging the future by the past, the Democratic party will have no fixed policy, on that or any other question.

At the close of the great civil war, which drenched the land with our best bloods, we owed a war debt of \$2,845,000,000. A great portion of the Democratic party advised the regulation, but the Republican party, holding sacred the obligations of the government, which it had upheld, devised and maintained a financial system which has been the wonder and admiration of the world.

Up to August, 1893, there had been paid, of the bonded indebtedness, of the United States, in principal and interest, \$4,478,397,945, besides the current expenses of the government, amounting to \$6,953,390,831.

In the future as in the past, the Republican party can be relied upon for a sound financial system. "The Republican party does not favor either a single gold standard, or silver monetary standard. It favors honest money, a currency of gold, silver and paper, with which to measure our exchange, which shall be as sound as the government, and as untarnished as its honor. It favors bimetalism, and demands the use of both gold and silver, as lawful money, in such ratio as will secure and maintain the parity of value of the two metals, so that the purchasing and debt paying power of the dollar shall be at all times equal, whether that dollar be gold, silver or paper."

**The Presidency.**

In a few weeks the representatives of the Republican party will assemble to nominate the next President of the United States. We demand of them the selection of a statesman for that high office, in no way controlled by a combination to hold up the government.

While we all have our personal preferences, it matters little whether that great honor shall come to a distinguished son of our own commonwealth pre-eminent in fitness, and who has served his people favorably and well both in public and private life; or whether it shall go to that matchless orator and peerless statesman, the able representative from the state of Maine; or whether it shall be given to that typical American, the great exponent of protection, the advocate and defender of American markets, American labor, and American homes, who, it is said, "was a soldier of the republic, a boy volunteer, knighted by his country's commission for conspicuous gallantry in the war of the Union, whose alma mater was the tented field, who graduated in a class of heroes, and whose diploma bears the signature of Abraham Lincoln, the author of that proclamation, which made millions free."

In a short time the great political contest for national control will be on. Its determination in favor of the one side means continual financial agitation and business depression; and will bring in its train, of attendant evils, additional national debt, and industrial retrogression.

Success in favor of the other side means the exercise, by every American citizen, of the full rights, guaranteed to him by our constitution, wherever the stars and stripes may wave. It means more rapid advancement in our industrial development; better wages; better home markets; and, in short, almost everything that goes to make up a happy and prosperous nation.

**Cancers and Tumors.**

Cured with mild oils, either external or internal; used by anyone with safety. For particulars and price of oils, address Dr. E. E. Indianapolis, Ind.

IT not only is so, it must be so, One Minute Cough Cure acts quickly, and that's what makes it go. Logan Drug Co., Wheeling, W. Va., B. F. Peabody, Benwood, and Bowie & Co., Bridgeport, O.

## A DIME FOR DIGESTION.

The Way to Help Your Stomach Out of a Difficulty.

When you are taken sick with pain in your stomach or chest, nausea, vomiting, headache, dizziness, nervousness, neuritis, flatulence, constipation, mental depression, weakness, languor, loss of appetite and other similar symptoms, you are infected with the poisons of undigested food.

Your stomach needs help.

A dime spent for a sample bottle of the Shaker Digestive Cordial will show you whether or not to expect help from that source.

If you really are a dyspeptic, it will relieve you after a few doses. If it does, keep on (ill you're cured. If not, don't take any more, you're no dyspeptic.

Indigestion or dyspepsia is a dreadful disorder, all the more that so few people believe in its dangerousness. It is because they don't die of indigestion, but of rheumatism, consumption, pneumonia, and other diseases which they would never have "caught" if their bodies hadn't been starved and weakened with indigestion.

Shaker Digestive Cordial acts on the food in your stomach and helps the digestive juices to do their work. It aids your stomach to do its work without effort and creates new strength and life for your whole body.

At druggists. Ten cents for a trial bottle.

Write to The Shakers, 30 Reach Street, New York, for an interesting book.

### GERMANY'S POPULATION.

Gratifying Increase Shown in the Census Just Taken.

WASHINGTON, D. C., April 27.—Germany takes a census of population every five years and the results of that taken last year, just made public, have caused much surprise and gratification, for they show that notwithstanding complaints of agricultural and manufacturing depression the population has increased more rapidly than in any five year period since the foundation of the empire, being 22,244,533 last December, an increase of 2,118,927, or 1.14 per cent per year.

These figures and other items of interest culled from the census tables are furnished the department of state by United States Commercial Agent Thomas Moore at Weimar, and he says that a striking illustration of the increase in population is afforded by a comparison with the French census which shows that the increase of population in France in the same five year period was 184,000. In this disparity, the Germans see a reason for the entertainment of a less warlike feeling by certain classes in France, which therefore tends to insure the peace of Europe.

### KNAPP SURRENDERED.

The American Missionary Safe in the Hands of the United States Consul.

(Copyright, 1896, by the Associated Press.)

CONSTANTINOPLE, April 25, via Sofia, Bulgaria, April 27.—The Rev. George P. Knapp, the American missionary who has been expelled from Bitlis by the Turkish authorities without trial on the charge of having incited Armenians to rebel against Turkish rule, was surrendered to the United States consul at Alexandretta on Saturday last. Details of the affair which reached here to-day show that the step was not taken until the United States wasp had been telegraphed for. Mr. Knapp, as already cabled, was expelled from Bitlis about a month ago, in spite of an agreement reached between the United States minister here, Mr. Alexander W. Terrill and the Turkish government (after the charges against Mr. Knapp had been discussed) that the American missionary should not have to leave his post until about April 1, or when the roads were tolerably free from snow, in order that he might be able to take his family with him.

The American missionary is now free and will probably, by the advice of the United States representative here, come to this city and offer to have his conduct at Bitlis thoroughly investigated before the United States charge d'affaires.

### BALFOUR REPLIES.

Giving the Status of the Venezuelan Negotiations.

LONDON, April 27.—The first lord of the treasury, Mr. A. J. Balfour, replying to Sir William Vernon Harcourt, the liberal leader, said in the house of commons to-day that arrangements for a condition of arbitration with respect to Venezuela and other questions are matters which Great Britain and the United States had in view during the recent negotiations. Mr. Balfour added that the last communication from the United States arrived on Friday last and is now under consideration.

Continuing Mr. Balfour said that the government would deal with both the general question of arbitration and also with the special question connected with Venezuela and it has confidently hoped that by patience and tact on both sides, a peaceful and satisfactory solution of the matters would be obtained.

### Penal Dead.

Special Dispatch to the Intelligencer.

HUNTINGTON, W. Va., April 26.—James D. Elder, a prominent young man of this city, was found in his room to-day unconscious. An empty morphine bottle was near. There are no hopes of recovery. No cause is assigned.

### Murder and Suicide.

ADRIAN, Mich., April 27.—Eugene Camburn, a farmer living near Tipton, was shot and fatally wounded by Henry Luce last night. Luce then shot himself dead. Luce, who had been paying attentions to Camburn's daughter, was refused admission to the house last night. He lay in wait for Mr. Camburn and shot him as he was entering the house and then committed suicide.

### Electrocuted.

SING SING, N. Y., April 27.—Carl Feigenbaum, alias Anton Lahn, who murdered Mrs. Johanna Hoffmann in New York on September 1, 1894, was executed by electricity in the state penitentiary here to-day. Feigenbaum protested his innocence to the last.

### Ran Aground.

OWEN SOUND, Ont., April 27.—The steamer C. Davis, with a cargo of coal from Cleveland, Ohio, ran aground last night while going into Presque Isle harbor. Tugs have been sent to her assistance.

### Hucklen's Arnica Salve.

The best salve in the world for fever, bruises, sores, ulcers, salt rheum, cuts, scalds, tetter, chapped hands, chilblains, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Logan Drug Company.

**Save Your Life**

By using "The New Great South American Kidney Cure." This new remedy is a great surprise on account of its exceeding promptness in relieving pain in the kidneys, bladder and back in male or female. It relieves retention of water, aches in the back, it acts immediately. Save yourself by using this marvelous cure.
